

VPD Compliance

If you are an asset management professional who wants to maintain real-time compliance with global regulatory, fund, portfolio, client and enterprise mandates, then choose VPD Compliance. VPD Compliance provides you with a centralised and organised real-time view of investment compliance operations, through its capability for monitoring pre-trade, post-execution, and end-of-day compliance.

A flexible rule-building facility makes it easy for you to set up and apply complex compliance rules. You can stress test portfolios and other composites, which will result in analytical information in terms of risk and performance, but also alert you of any limits exceeded according to compliance rules.

VPD Compliance provides the resulting data in a variety of formats, for use in management, communication and analysis. The rules apply to both global regulations on different markets, and to rules decided by management or as a reflection of a specific investment mandate.

Features at a glance

- Flexible rule editor
- Limit management and control
- Support for automatic surveillance
