### **Improved functions in the mid-office tool for attribution analysis, VPD Explorer**

The VPD Explorer, covering attribution analysis and drill down functions for various risk and performance data has now been released in a new and further improved version. The graphical user interface is even stronger. The flexibility is unrivalled when it comes to the options to slice-and-dice the performance and risk data in any manner of your choice. The user interface is straightforward and very appealing.

As VPD Explorer is the key application in the VPD Attribution module there will be yet another release shortly, as the complete module will be upgraded with a new firm wide attribution model during Q2/2005.

**Versatile - Powerful - Distinct**
